provision of  
business continuity  
management solutions**

# About Us

Teed Business Continuity is a leading consultancy specialising in the provision of practical and cost effective business continuity management solutions, ensuring our clients will be in complete control in the event of a crisis situation or incident.

*Teed has worked on behalf of more than 150 organisations across a broad range of industries and sectors since the company's inception in 1999. Whether a large multinational organisation or a small professional firm, each client is assured of the same high standard of consultancy input and attention to detail.*

Rather than sticking to a rigid method, we use pragmatic, flexible and commercially focused methodology adapted to suit each client's individual approach and objectives. The resulting deliverable will be straightforward, concise and above all, useable.

*A major focus of any of our projects is upon keeping recovery solutions at a cost effective and affordable level, ensuring that inexpensive in house workarounds are identified and utilised, where feasible.*

Each project is led by a senior consultant supported by a strong team who together bring to the table a wealth of knowledge and experience. This transforms what is often perceived as a complex and overwhelming business continuity project into a simple process, building upon proven methods and innovative ideas used when working with other organisations.

*All advice is provided from an independent perspective and Teed adhere to the standards and good practice as defined by the Business Continuity Institute, BS 25999 standard for business continuity management and other recognised bodies and standards.*
